saints row 3 steelport gangs pack

Very bad game. i really want a refund. Its a gamer for phones not for PC. Hate it

. Boring dlc to grab your hard earn cash to a game that is pretty awful in itself.

. There isn't much to be said about this game that hasn't been said before. Yes, you can build with a lot of materials, yes, you can make civilizations with "humans", and yes, you can make minigames. However here's the reason that *I* recommend this. If you're on a phone, you get the "standard definition" mode, which means that you get a pretty tiny map to work with. On PC however, you get "high definition" mode, which gives you, I'd say about 4 times as much space to pack in blocks, water, and plants. Also, since there is no demo for this, I recommend you at least try it on Google Play or iTunes, whichever you have, and play it first there. If you like it, buy it here because you'll be paying \$20 for the elements alone on the phone version and that's not even factoring in the mission packs... You get all of that for \$5 on Steam. Buy it here.... Even if we are in 2018 this is a very good game.I bought it today and i was shocked because it has cool gameplay and graphics.I recommed this game.. Utterly incredible arena shooter. Amazing graphics, amazing sound, fantastic production values. I've had more pure fun with this than anything else this year.

puzzle game with cubes. i found it boring but its well made. quot;If i see you next to never how we can we say forever... wherever you go whatever you do.. i will be right here waiting for you". Subsiege takes an interesting take on underwater MOBA witch a squad-like gameplay even though you mostly play your squad as if it was one hero.

The constant loss of oxygen adds the spice to this arena game. Players can't hide and the encounter is around the corner. The fighting needs some polish in my view though it's already fun and challenging. You also can improve your units which will give you better options in later game stages. I just have experience from a few battles - so far it's fun for me, I will dive into more.

It's an eraly stage release but I was positively overwhelmed about the high level of polish in this game. There is lots of potential to grow into the right direction. The basics are already here.

If you like to see more indie MOBAs definitely give this a try and support these dudes with contiburting to their development.. Finished this pretty quick tbh. Makes a great party game. This is the next step in puzzle games. Afer playing many adventure type puzzle games (Myst, Riven, Quern, Obduction, etc), this is just straight puzzles with a story line put together to sew them together. Sure, some won't like the ending but isn't the journey what matters? Great graphics and ambience! Good storyline. Lasted longer than its rivals - The Room and The Room Two. Sure to please if you are in a thinking mood - great hints for those who get stumped.. quick fun game, nice music. A future intelligence with no concept of what a human being is finds a dead astronaut and proceeds to reconstruct his memories to try and understand what he is and what happened: this translates into a game where you control two beams of light and collect memories accompanied by high tempo music and beautiful sights. Laserlife is part rhythm game part trippy experience and, while brief, its fun gameplay, great music and dreamlike imagery make it an hidden gem.

PROS:

- good graphics, the various images appearing during levels are nicely done and in sync with the music
- great soundtrack, good sound design
- the gameplay is simple but quite fun and slowly ramps up in speed and difficulty
- tight and responsive controls
- different difficulty levels make the game as relaxing or as challenging as you want
- slowly uncovering memories is nice, while there's no real story discovering the astronaut's life and what happened on his last trip was intriguing
- leaderboards for each game level and difficulty setting for those so inclined

CONS:

- a few sections get a bit too crowded on the background, making memory pieces hard to see
- a slight framerate drop at the end of some levels (no impact on gameplay, but was a bit annoying)
- short, it'll take you 1,5/2 hours to finish and, unless you want to go for an high score on certain levels, there's no replay value

<http://steamcommunity.com/sharedfiles/filedetails/?id=547429090>

I really liked Laserlife, the gameplay is fun and keeps you on your toes, the levels sport nice and trippy graphics, the soundtrack alternates between high tempo and slower tracks to mix things up a bit and the various memories were interesting enough to keep going for more.

It's a bit of a shame that it's so short, the 12 levels go by quickly (in fact the devs recommend playing through the game in one

sitting) and once you're done there's not much else to do, they'd also have done a bit more with the story rather than just giving us bits and pieces of memories.

All things considered if you're a fan of the genre or just want something different Laserlife is an easy recommendation, just avoid getting it for full price since I feel it's too much for the amount of gameplay you get: thankfully it goes as low as 5\$ when on sale.
